Ethiopian

SKILLS

- HTML/CSS /JAVASCRIPT
- REACT JS / NODE JS/ EXPRESS JS / MONGO DB
- MACHINE LEARNING / DEEP LEARNING
- GIT / GITHUB
- C++/ JAVA / PYTHON

LANGUAGES

- English | Advanced
- Amharic | Native

OBJECTIVE

To leverage my skills in software development, problem-solving, and emerging technologies to build innovative, scalable solutions that address real-world challenges while continuously growing as a professional in a dynamic, collaborative environment

EXPERIENCE

FULL-STACK DEVELOPER

NEXUS LABS. Addis Ababa|Aug 2024-Feb 2025

Worked as a MERN Stack Developer, building and optimizing web applications with a focus on performance, scalability, and clean UI/UX.

SOFTWARE DEVELOPER INTERN

DAN ENERGY. |Jul 2023-Oct 2023

Developed a React Native Field Worker App with real-time task assignment, GPS tracking, and progress monitoring. Enhanced app functionality, UI/UX, and ensured reliable performance through rigorous testing.

EDUCATION

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING Link

Arba Minch University. Arba Minch | Oct 2019-Jul 2024

CGPA - 3.86

PROJECTS

Ethiopian sign language translation system Link

Developed an Ethiopian Sign Language Translation System (ESLTS) using deep learning techniques, speci cally LSTM, to translate sign language gestures into text. The system involved data collection, preprocessing, and model training to achieve accurate gesture recognition. A desktop application was built with Python Tkinter for an intuitive user interface, enabling real-time translation and enhancing communication accessibility for the Ethiopian deaf community
